

## PRODUCT END-OF-LIFE NOTICE

This EOL is after the streamlining of the Nordic ID product portfolio.

As there is a large base of installed HH53 devices, we have made sure that the transition to the new device will be entirely transparent for existing deployments, as they will share the same APIs and communication interfaces.

We realize that a product discontinuation may cause some inconvenience to our customers. Our sales and technical support teams are ready to help during the transition and answer any questions about our products and solutions. The previously launched HH83 and HH85 series products can accomplish the same tasks and more. Please contact us at <https://www.nordicid.com/contact-us/> to learn about replacing products.

And, of course, if there is still some need to purchase HH53 devices to make this transition smoother, we will still be delivering those **until 31.12.2022** (see EOL timeline below).
